What are the major strengths of this class? What is helping you to learn? (Q979)

Comments
There are too many to list. I came in with low expectations as this is a new course, and I did not know what to expect. Professor Rampure has surpassed all expectations. This class is one of the best organized classes I have ever had the pleasure of taking. In addition, Professor Rampure is a fantastic lecturer! I have found it exceedingly rare that a class has both...
Major strengths: organization and communication are both phenomenal
Content is very interesting and related to the CS field. Professor is extremely passionate about topics and very knowledgeable in the subject.
The lectures are great!
Suraj is super personable with his students and epic
I really enjoy this class, it helps a lot for ML study.
Good lectures, very good notes, labs are very easy to follow

How can Suraj Rampure improve this class? If possible, give specific examples. (Q980)

Comments
I honestly have no additional suggestions. I think the EECS298 staff have been incredibly transparent with students and every student *should* know exactly what is expected of them to succeed in this class.
I think the most recent exam had way too many questions for the amount of time given and the mean and median for the exam accurately represents that. I believe on future exams, either more time should be given for the problems or less problems should be given in the amount of time allotted.
No notes.
Release course notes earlier so I can study, but mostly it's good on time.
More projects/group work

Please enter any additional comments you have for Suraj Rampure. (Q981)

Thank you for all of the time and energy you have put into this course. It is appreciated! :)
Thank you!
You're literally the goat of being a professor, and thank you for the opportunities and letter of rec, and also giving huge info

Suraj is a phenomonal teacher, his style helps me learn and I can tell he is most interested in improving our understanding of the content.

How can Suraj Rampure improve this class? If possible, give specific examples. (Q980)

Comments

Making sure to have the 5-minute break is important in my opinion. The content is heavy and it can become overwhelming over the course of 80 minutes. It seems Suraj often forgets or misapplies the break, but I appreciate the attempts and understand the potential disagreement on its importance.

What are the major strengths of this class? What is helping you to learn? (Q979)

Comments
The lectures are nice, I think the homeworks help a lot and they're not too much work.
I typically have low regard for labs in classes like this as I haven't found them to be helpful, merely a time draw. That couldn't be farther from the truth for this class. EECS298 labs are incredibly well thought out and directly relevant to material recently covered in lecture. Additionally, they are superb help for the homeworks and as midterm practice! Angela is doing a great job as IA (I believe she is an IA, if she is a GSI, I apologize).
Major strengths: very well thought out and put together assignments, staff receptive to questions
The lab person is great

Comments
The midterm was a lot — I think it could have been shorter.
For all EECS298 staff (not just Professor Rampure): A specific action that would enhance my learning in this course would be to go over solutions from the past week's lab at the beginning of each lab. I appreciate that staff puts solutions out there at all and in a timely manner, but I find that I don't have the time or forget to go over them. I acknowledge that this is due to my own time management, but if this is something EECS298 staff could implement, I would find it very helpful!
